Research interests

I am interested in learning about people and how they use technology. My projects are usually at the intersection of computer science, medicine, design, and social sciences. I am an expert in ethnographically informed design, user-centred design, and participatory design approaches.

Broad keywords for my work would be: Human-Computer Interaction, Computer-Supported Cooperative Work, Health Informatics, and Science and Technology Studies.

Education

- | | |
|-----------|--|
| 2012–2017 | PhD in Informatics (Human-Computer Interaction), TU Wien <i>Thesis: “The Everyday Life with Parkinson’s and Self-care Technologies”. Supervised by Geraldine Fitzpatrick.</i> |
| 2005–2010 | MSc & BSc in Informatics and Computing Engineering, University of Porto <i>Thesis: “Healthcare TV Based User Interfaces for Older Adults”. Supervised by Teresa Galvão and Paula Alexandra Silva.</i> |

Experience

- | | |
|-----------|---|
| 2017–now | Senior researcher, Fraunhofer Portugal AICOS, Porto |
| 2016–2017 | Researcher, NOVA-LINCS, Universidade Nova de Lisboa, Lisboa |
| 2012–2017 | PhD Student, Institute for Design and Assessment of Technology, TU Wien, Vienna |
| 2010–2012 | Researcher, Fraunhofer Portugal AICOS, Porto |
| 2008–2010 | Research Assistant, Fraunhofer Portugal AICOS, Porto |

Grants, honours & awards

ACQUIRED PROJECT GRANTS

- | | |
|------|--|
| 2011 | “Smartphones for Smart Seniors (S4S)” funded by ANI (Portugal) – €137K <i>Lead proposal writer.</i> |
|------|--|

- 2011 “Personal Health Device for the Remote and Autonomous Management of Parkinson’s Disease (REMPARK)” funded by FP7-ICT (EU) – €411k
Co-proposal writer.
- 2011 “CellPipe UI” funded by Alcatel-Lucent – €49k
Co-proposal writer.

OTHER GRANTS AND HONOURS

- 2016 Two special recognitions for an ‘Excellent Review’ at CHI 2016
- 2016 Grant for attending conference from TU Wien (€1390)
- 2015 Grant for attending CHI 2015 doctoral consortium (\$1300)
- 2012 Vienna PhD School of Informatics scholarship (3 years of funding)
- 2012 Dance! Don’t Fall was on the Top-25 Apps, CES Mobile Apps Showdown
- 2011 Smart Companion was 2nd most creative app, ZON Creativity Award (prize: €6250)
- 2010 Mover was 5th best Lifestyle app, Android Developer Challenge II (prize: equipment)

Teaching & supervision experience

COURSES

- Summer 2015 HCI in Healthcare (MSc) – Co-teaching and supervision of student projects at TU Wien
- Winter 2014 User Research Methods (MSc)– Co-teaching and supervision of student proj. at TU Wien

SUPERVISED STUDENTS

- ongoing Cristiana Braga (MSc), Evaluation of a system for shiftworkers working in healthcare
- 2018 João Almeida (MSc), Restaurant recommendation system for people with food allergies
- 2015 Martin Herndl (BSc), Developing an Android Self-Management Application for People with Parkinson’s Disease
- 2012 João Cevada (MSc), User Interface Design Recommendations for Fitting Smartphone Applications to Persons With Parkinson’s

Projects

ONGOING

- 2014-2018 *Clockwork* (EU AAL-JP) – This project is developing technologies to support the self-care of shift workers. Since April 2017, I am the PI at AICOS, in charge of supervising the user research, design, and evaluation of the smartphone app and the smart badge. I also coordinate the project consortium. <http://clockworkproject.eu/>
- 2016-2019 *Physio@Home* (PT 2020) – This project is developing a solution for physical rehabilitation, at home and at clinic, using wearable sensors and serious games. Since June 2017, I am the PI at AICOS, in charge of supervising the design and evaluation of the serious games.
- 2015-2018 *MASPARK* (La Marató de TV3) – This project is developing a system that can detect and address freezing of gait in patients with Parkinson’s. Since April 2017, I am the PI at AICOS, in charge of supervising the design and evaluation of the system.

SELECTION OF PREVIOUS PROJECTS

- 2011-2015 *REMPARK* (EU ICT-FP7) – This project developed a wearable system to monitor symptoms of people with Parkinson’s, intervene in the gait, and collect data to improve the therapy. I participated in the first year of the project and was involved in user research and early design phases of the smartphone apps for patients. <http://www.rempark.eu/>
- 2010-2012 *Smart Companion* (Internal) – This project created an Android skin specifically designed for older people. I participated in the user research, design, and evaluation of the smartphone applications. Smart Companion is today being sold by GOCIETY under the name GOLIVEPHONE. <http://smartcompanion.projects.fraunhofer.pt>
- 2009-2012 *eCAALYX* (EU AAL-JP) – This project created a telehealth system for older adults with chronic conditions. I participated in the the user research, design, and evaluation of the TV interfaces for older adults. <http://ecaalyx.org>
- 2009-2012 *Mover* (Internal) – This project created an Android app that explored the accelerometer to capture activity and thus promote movement. I participated in the design and evaluation of the app. Mover is today being sold as part of the GOLIVEPHONE mentioned above. <http://mover.projects.fraunhofer.pt/>
