Research interests

I am interested in learning about people and how they use technology. My projects are usually at the intersection of computer science, medicine, design, and social sciences. I am an expert in ethnographically informed design, user-centred design, and participatory design approaches.

Broad keywords for my work would be: Human-Computer Interaction, Computer-Supported Cooperative Work, Health Informatics, and Science and Technology Studies.

Education

2012-2017 PhD in Informatics (Human-Computer Interaction), TU Wien
Thesis: "The Everyday Life with Parkinson's and Self-care Technologies". Supervised by Geraldine Fitzpatrick.

2005-2010 MSc & BSc in Informatics and Computing Engineering, University of Porto
Thesis: "Healthcare TV Based User Interfaces for Older Adults". Supervised by Teresa Galvão and Paula Alexandra Silva.

Experience

2017-now Senior researcher, Fraunhofer Portugal AICOS, Porto
2016-2017 Researcher, NOVA-LINCS, Universidade Nova de Lisboa, Lisboa
2012-2017 PhD Student, Institute for Design and Assessment of Technology, TU Wien, Vienna
2010-2012 Researcher, Fraunhofer Portugal AICOS, Porto
2008-2010 Research Assistant, Fraunhofer Portugal AICOS, Porto

Grants, honours & awards

ACQUIRED PROJECT GRANTS

2011 "Smartphones for Smart Seniors (S4S)" funded by ANI (Portugal) – €137K
Lead proposal writer.

2011	"Personal Health Device for the Remote and Autonomous Management of Parkinson's Disease (REMPARK)" funded by FP7-ICT (EU) – €411k
	Co-proposal writer.
2011	"CellPipe UI" funded by Alcatel-Lucent – €49k
	Co-proposal writer.

Other grants and honours

2016	Two special recognitions for an 'Excellent Review' at CHI 2016
2016	Grant for attending conference from TU Wien (€1390)
2015	Grant for attending CHI 2015 doctoral consortium ($1300)
2012	Vienna PhD School of Informatics scholarship (3 years of funding)
2012	Dance! Don't Fall was on the Top-25 Apps, CES Mobile Apps Showdown
2011	Smart Companion was 2nd most creative app, ZON Creativity Award (prize: €6250)
2010	Mover was 5th best Lifestyle app, Android Developer Challenge II (prize: equipment)

Teaching & supervision experience

Courses

| Summer 2015 | HCI in Healthcare (MSc) – Co-teaching and supervision of student projects at TU Wien |
| Winter 2014 | User Research Methods (MSc)– Co-teaching and supervision of student proj. at TU Wien |

Supervised students

ongoing	Cristiana Braga (MSc), Evaluation of a system for shiftworkers working in healthcare
ongoing	João Almeida (MSc), Restaurant recommendation system for people with food allergies
2015	Martin Herndl (BSc), Developing an Android Self-Management Application for People with Parkinson's Disease
2012	João Cevada (MSc), User Interface Design Recommendations for Fitting Smartphone Applications to Persons With Parkinson's

Projects

Ongoing

2014-2018	*Clockwork* (EU AAL-JP) – This project is developing technologies to support the self-care of shift workers. Since April 2017, I am the PI at AICOS, in charge of supervising the user research, design, and evaluation of the smartphone app and the smart badge. I also coordinate the project consortium. http://clockworkproject.eu/
2016-2019	*Physio@Home* (PT 2020) – This project is developing a solution for physical rehabilitation, at home and at clinic, using wearable sensors and serious games. Since June 2017, I am the PI at AICOS, in charge of supervising the design and evaluation of the serious games.
2015-2018	*MASPARK* (La Marató de TV3) – This project is developing a system that can detect and address freezing of gait in patients with Parkinson's. Since April 2017, I am the PI at AICOS, in charge of supervising the design and evaluation of the system.

2011-2015   *REMPARK* (EU ICT-FP7) – This project developed a wearable system to monitor symptoms of people with Parkinson's, intervene in the gait, and collect data to improve the therapy. I participated in the first year of the project and was involved in user research and early design phases of the smartphone apps for patients. http://www.rempark.eu/

2010-2012   *Smart Companion* (Internal) – This project created an Android skin specifically designed for older people. I participated in the user research, design, and evaluation of the smartphone applications. Smart Companion is today being sold by GOCIETY under the name GOLIVEPHONE. http://smartcompanion.projects.fraunhofer.pt

2009-2012   *eCAALYX* (EU AAL-JP) – This project created a telehealth system for older adults with chronic conditions. I participated in the the user research, design, and evaluation of the TV interfaces for older adults. http://ecaalyx.org

2009-2012   *Mover* (Internal) – This project created an Android app that explored the accelerometer to capture activity and thus promote movement. I participated in the design and evaluation of the app. Mover is today being sold as part of the GOLIVEPHONE mentioned above. http://mover.projects.fraunhofer.pt/

Service

Program committee member

2016   Mindcare 2016
2016   PervasiveHealth 2016
2015   PervasiveHealth 2015
*   And in workshops at CHI'16, GROUP '14, Ubicomp '13, and SouthCHI '13

Workshop organizer

2014   Designing Self-care for Everyday Life at NordiCHI '14 (link)
2014   Designing Systems for Health and Entertainment: what are we missing? at ACE '14 (link)

Media mentions

Mover was mentioned in the Jornal de Negócios (30/04/2010) and Diário de Notícias (29/05/2010). Smart Companion was described in RTP (01/08/2011), Porto Canal, and another time at Porto Canal (26/07/2012) when I was even interviewed.

Languages

Portuguese – native
English – proficient
Spanish – fluent
French – intermediate (DELF A4 certificate)
German – intermediate (B1.1 certificate)
